

GZ Series

Universally sturdy, versatile, effective!

Batch centrifuge GZ for de-oiling, washing or drying metal chips and parts. The principle is easy to explain: the chips or parts are placed directly in the drum. For high load weights, the GZ is also available in a heavy-duty version with substantial counterbalances.

Manual

All types of chips or parts

Batch operation

Up to 1.800 kg/h or up to 2.500 l/h
